Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

ART REJECTION:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-45 rejected under 35 U.S.C. 103(a) as being unpatentable over Krishan et al(6,975,222).

-- In considering claims 1-45, the claimed subject matter that is met by Krishan et al(Krishan) includes:

1) the key operated lock including lock body including a key operated locking assembly, tamper monitorable locking assembly, wireless communication circuit, remotely monitorable indication of the locking and unlocking, and locking assembly being operated by an electronic lock are met by the lock assembly(14) including cable and microprocessor(15)(see: column 2, lines 6 et seq).

With regards to the shipping container with closures, RFID, magnet and reed switch sensors, and closure pin connected to body, although not specifically taught by Krishan, use of these devices for monitorable lock bodies are well known in the art, and therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate these devices into the system of Krishan, since this would have enhanced the operation of the lock of Krishan by providing accurate

sensors for the for determining unauthorized access to the lock, as well as monitoring of the overall operation of the lock.
